Oops! Typo-
Meant \$5:00 per 1000 gallons. Total of \$15,000 still correct.

Gary,
Then the Trustee needs to indicate whether he is okay with your new estimate before we proceed. I am in a mandatory course in the morning. Please email if you need me.

The volume of water needed to be discharged will continue as rainfall occurs on-site. As of today, I estimate that we have approximately 300,000 gallons. It is important to understand that for each 1 inch rainfall another estimated 157,000 gallons of stormwater falls on the site.

Rainfall Amount	Volume of Water
1 inch	157,000
2 inch	314,000
3 inch	471,000

Even with the discharge to the sanitary sewer of the current amount additional rainfall will occur. EPA will do its best to address the current on-site spills and any sediment that has deposited below the water surface in order that releases can begin to be discharged normally through the storm sewer. In order to do this, we need to get rid of the current water on the site.

Also, we will need to work with the wastewater treatment plant so that we don't discharge to them during a rain event but only during dry weather so as not to increase the stormwater during these times of high flow through the sanitary sewer.

During the course of the project, I would expect that possibly as high as 2,000,000 to 3,000,000 gallons could be

easily be possible if not more.

Thanks

Subject: CES Sewer Service Application

Gary,

Steve Shurn, counsel for the CES Trustee, has requested the City clarify the following elements of Mr. Askanase's application for sewer service:

1. Any payment be made subject to bankruptcy court approval
2. The security deposit be waived
3. An estimated cost be provided

I have therefore prepared the attached cover letter agreeing to these qualifications. The last one, however, depends on the estimates you have provided. In the interest of making sure we are all on the same page, and so the Trustee has a ballpark idea of what Administrative Expenses will be involved, can you please countersign the cover letter on page 2?

I am also attaching the 2014 rates. The Commercial sewer service fees are located on the top of page 4.

Thank you,

James
